## API COLOMBIA

API Colombia is a public RESTful API that enable users to obtain a variety of public information about the country "Colombia".

### Project Support Features

- Minimal API's endpoints to get information about :
  - General information about the country.
  - Departments/States.
  - Region.
  - Cities.
  - Presidents.
  - Tourist attractions.
- Swagger documentation.
- Does not require authentications.
- You can obtain the pageList endpoints that return the paged information.

add to the end of each endpoint **/pagedList**

example:

`/api/{version}/city/pagedList`
